library, normalized, full-length."
/note="Vector: pCMVSport6.1; Site 1: BCORI; Site 2: NotI;
supplier: RNA was isolated from Nicotiana benthamiana
tissues that include callus, roots from liquid culture
grown plants, heat-stressed leaves (38 C, 3 hr and 6 hr),
cold-stressed leaves (5 C 3 hr, 6hr), and pathogen
challenged leaves (Pseudomonas syringae pv tomato 12 hr;
Xanthomonas campestris pv campestris 12 hr, 18hr;
Pseudomonas syringae pv phaseolicola 18hr, and Xanthomonas
campestris pv vesicatoria 18hr). RNA was isolated from
thace tissues and nocled in approximately emal molar

library, normalized, full-length"
/note="Vector: pCWVSport6.1; Site 1: ECORI; Site 2: NotI;
supplier: RNA was isolated from Nicotiana benthamiana
tissues that include callus, roots from liquid culture
grown plants, heat-stressed leaves (38 C, 3 hr and 6 hr),
cold-stressed leaves (5 C 3 hr, 6hr), and pathogen
challenged leaves (9esudomonas syringae pv tomato 12 hr;
Xanthomonas campestris pv campestris 12 hr, 18hr;
Pseudomonas syringae pv phaseolicola 18hr; and Xanthomonas
campestris pv vesicatoria 18hr). RNA was isolated from
these tissues and pooled in approximately equal molar
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             4230

grown plants, heat-stressed leaves (38 C, 3 hr and 6 hr), cold-stressed leaves (5 C 3 hr, 6hr), and pathogen challenged leaves (Pesudomonas syringae pv tomato 12 hr; Ashthomonas campestris pv campestris 12 hr, 18hr; Pseudomonas syringae pv phaseolicola 18hr, and Xanthomonas campestris pv vesicatoria 18hr). RNA was isolated from these tissues and pooled in approximately equal molar
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     755 CGAGGAAGCGGTCACCCCATTCGCCGCCAAGCTCTTCAGCAATATCACGGGTAGCCAACG

library, normalized, full-length"
/note="Vector: pCWVSport6.1; Site 1: EcoRI; Site 2: NotI; supplier: RNA was isolated from Nicotiana benthamiana tissues that include callus, roots from liquid culture grown plants, heat-stressed leaves (38 C, 3 hr and 6 hr), cold-stressed leaves (5 3 hr, 6hr), and pathogen challenged leaves (5 3 hr, 6hr), and pathogen challenged leaves (5 Secudomonas syringae pv papsetris 12 hr, 18hr; Pseudomonas syringae pv phaseolicola 18hr, and Xanthomonas campestris pv vesicatoria 18hr). RNA was isolated from these tissues and pooled in approximately equal molar
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                4324
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           4384
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  4444

TITLE Generation of RST sequences from Nicotians heathamians	Į.

```
tiana benthamiana mixed tissue cDNA zed full-length"

CMVSport6.1; Site.1: ECORI; Site.2: NotI; site.1solated from Nicotiana benthamiana lude callus, roots from liquid culture at-stressed leaves (38 C, 3 hr and 6 hr), so (Besudomonas syringae pv tomato 12 hr; estris pv campestris 12 hr, 18hr; estris pv campestris 12 hr, 18hr; and Xanthomonas sicatoria 18hr). RNA was isolated from d pooled in approximately equal molar
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       ö

Double strand cDNA synthesis was done by LD PCR using the following program: 950C for 5 min denaturation and subsequent 20 cycles at 950C (2min) and 680C (6min). After Sfil digestion the CDNA was fractionated with CHROMA. Spin-400 columns. These cDNAs were ligated overnight into pTriplEX2 vectors."

supplier: RNA was isolated from Nicotiana benthamiana
tissues that include callus, roots from liquid culture
grown plants, heat-etressed leaves (38 C, 3 hr and 6 hr),
cold-stressed leaves (5 C 3 hr, 6hr), and pathogen
challenged leaves (Fesudomonas syringae pv tomato 12 hr;
Xanthomonas campestris pv campestris 12 hr, 18hr;
Pseudomonas syringae pv phaseolicola 18hr, and Xanthomonas
campestris pv vesicatoria 18hr). RNA was isolated from
these tissues and pooled in approximately equal molar EST75019 Nicotiana benthamiana mixed tissue cDNA library, normalized, full-length Nicotiana benthamiana cDNA library, cK287297 4208 4268 4328 737 617 557 Nicotiana benthamiana Nicotiana benthamiana Eukaryota, Viridiplantae, Streptophyta, Embryophyta, Tracheophyta, Genomics GCTATGTCCTGATAGCGGTCCGCCACACCCCACGCCGCCACAGTCGATGCAAAAG 676 GCTATGTCCTGATAGCGGTCCGCCACACCCAGCCGGCCACAGTCGATGAATCCAGAAAAG CGGCCATTITCCACCATGATATICGGCAAGCAGGCATCGCCATGGGTCACGACGAGATCC 616 CGGCCATTTTCCACCATGATATTCGGCAAGCAGGCATGGCCATGGGTCACGACGAGGATCC 4089 TGGCAGGTTGGCCGTCGCTTGGTCGGTCATTTCGAACCCCCAGAGTCCCGCTCAGAAGAAC 856 TGGCAGGTTGGCCGTCGCTTGGTCGGTCATTTCGAACCCCCAGAGTCCCGCTCAGAAGAAC 4149 TCGTCAAGAAGGCGATAGAAGGCGATGCGCTGCGAATCGGGAGCGGCGATACCGTAAAGC ACGAGGAAGCGGTCAGCCCATTCGCCGCCAAGCTCTTCAGCAATATCACGGGTAGCCAAC Gaps core eudicots; Spermatophyta; Magnoliophyta; eudicotyledons; core eudicot asterids; lamiids; Solanales; Solanaceae; Nicotiana.
